(f) Calculation of Interest Amount: As soon as practicable and in accordance with the procedure specified herein, the Calculation Agent will determine the Applicable Rate and calculate the amount of interest payable (the “Interest Amount”) with respect to each Authorized Denomination for the relevant Interest Period.

The Interest Amount with respect to any Interest Period shall be a USD amount calculated on the relevant Fixing Date (as defined below) as follows:

IDR 650,000 per Authorized Denomination
divided by
the Applicable Rate

(and rounding, if necessary, the entire resulting figure to the nearest two decimal places, with USD 0.005 being rounded upwards).

The “Applicable Rate” means the rate determined by the Calculation Agent that is equal to the USD/IDR spot rate, expressed as the amount of IDR per one USD, for settlement in two IDR Business Days, reported on Reuters page ABSIRFIX01 (or such other page or service as may replace any such page for the purposes of displaying the USD/IDR reference rate) at or around 11:00 a.m. Singapore time on the Fixing Date (such date, subject to adjustment as described below)

The “Fixing Date” means the date that is five Relevant Business Days prior to the applicable Interest Payment Date or Maturity Date. The Fixing Date shall be subject to adjustment as follows: if the scheduled date of the Fixing Date is not a Relevant Business Day, then the Fixing Date will be the first preceding day that is a Relevant Business Day.

“IDR Business Day” means a day (other than a Saturday or a Sunday) on which banks and foreign exchange markets are open for business in Singapore.

Fallback Provisions: Should no USD/IDR reference rate appear on Reuters page ABSIRFIX01 (or on such replacement page as described above) on the Fixing Date, then the USD/IDR reference rate for such Fixing Date shall be determined by the Calculation Agent by requesting quotations for the mid USD/IDR spot foreign exchange rate either (i) at or about 11:00 a.m. Singapore time on the first day (other than a Saturday or a Sunday) following the Fixing Date (if such day is a Relevant Business Day) or (ii) if the first day (other than a Saturday or a Sunday) following the Fixing Date is not a Relevant Business Day, at or about 11:00 a.m. Singapore time on the Fixing Date from five banks active in the USD/IDR currency and foreign exchange markets (such banks, the “Reference Banks”) as selected by the Calculation Agent.

If five or four quotations are provided as requested, the USD/IDR reference rate will be the arithmetic mean (rounded to the nearest whole Rupiah, 0.5 being rounded upwards) of the remaining three or two such quotations, as the case may be, for such rate provided by the Reference Banks, after disregarding the highest such quotation and the lowest such quotation (provided that, if two or more such quotations are the highest such quotations, then only one of such quotations shall be disregarded, and if one or more such quotations are the lowest quotations, then only one of such lowest quotations will be disregarded).

If only three or two such quotations are provided as requested, the USD/IDR reference rate shall be determined as described above except that the highest and lowest quotations will not be disregarded.

If only one or no such quotations are provided as requested, or if the Calculation Agent determines in its sole discretion that no suitable Reference Banks active in the USD/IDR currency or foreign exchange markets will provide quotes, the Calculation Agent shall be entitled to calculate the USD/IDR reference rate acting in good faith in a commercially reasonable manner, having taken into account relevant market practice, by reference to such additional sources as it deems appropriate; and in such case the Calculation Agent shall notify the Bank and the Global Agent as soon as reasonably practicable that the USD/IDR reference rate is to be so determined.

General Information

Additional Information regarding the Notes

1. The EU has adopted a Directive regarding the taxation of savings income (the “Savings Directive”). The Savings Directive requires Member States (as defined below) to provide to the tax authorities of other Member States details of payments of interest and other similar income paid by a person to an individual in another Member State, except that Austria and Luxembourg will instead impose a withholding system for a transitional period unless during such period they elect otherwise.

The Bank undertakes that it will ensure that it maintains a paying agent in a country which is a member of the European Union (a “Member State”) that will not be obliged to withhold or deduct tax pursuant to the Savings Directive.

2. United States Tax Matters

A) United States Internal Revenue Service Circular 230 Notice: To ensure compliance with Internal Revenue Service Circular 230, prospective investors are hereby notified that: (a) any discussion of U.S. federal tax issues contained or referred to in this Pricing Supplement, the Prospectus or any other document referred to herein is not intended or written to be used, and cannot be used, by prospective investors for the purpose of avoiding penalties that may be imposed on them under the United States Internal Revenue Code; (b) such discussions are written for use in connection with the promotion or marketing of the transactions or matters addressed herein; and (c) prospective investors should seek advice based on their particular circumstances from an independent tax advisor.

B) The “Tax Matters” section of the Prospectus and any tax disclosure in this pricing supplement is of a general nature only, is not exhaustive of all possible tax considerations and is not intended to be, and should not be construed to be, legal, business or tax advice to any particular prospective investor. Each prospective investor should consult its own tax advisor as to the particular tax consequences to it of the acquisition, ownership, and disposition of the Notes, including the effects of applicable U.S. federal, state, and local tax laws and non-U.S. tax laws and possible changes in tax laws.

C) Due to a change in law since the date of the Prospectus, the second paragraph of “—Payments of Interest” under the United States Holders section should be read as follows: “Interest paid by the Bank on the Notes constitutes income from sources outside the United States but will, depending on your circumstances, be “passive” or “general” income for purposes of computing the foreign tax credit.”

D) Due to a change in law since the date of the Prospectus, the fourth paragraph of “—Purchase, Sale and Retirement of the Notes” under the United States Holders

section should be read as follows: "Capital gain of a noncorporate United States holder that is recognized in taxable years beginning before January 1, 2011 is generally taxed at a maximum rate of 15% where the holder has a holding period greater than one year."

3. *Noteholders should consult their own tax advisors concerning the consequences of owning the Notes in their particular circumstances under the Internal Revenue Code and the laws of any other taxing jurisdiction.*

4. Additional Investment Considerations:

The Notes offered by this Pricing Supplement are complex financial instruments and may not be suitable for certain investors. Investors intending to purchase the Notes should consult with their tax and financial advisors to ensure that the intended purchase meets the investment objective before making such purchase.

There are various risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk. Investors should consult with their own financial, legal and accounting advisors about the risks associated with an investment in these Notes, the appropriate tools to analyze that investment, and the suitability of the investment in each investor's particular circumstances. Holders of the Notes should also consult with their professional tax advisors regarding tax laws applicable to them.

The Bank will hedge its obligations under the Notes by entering into a swap transaction with an affiliate of the Lead Manager as swap counterparty. Assuming no change in market conditions or any other relevant factors, the price, if any, at which the Managers or another purchaser might be willing to purchase Notes in a secondary market transaction is expected to be lower, and could be substantially lower, than the original issue price of the Notes. This is due to a number of factors, including that (i) the potential profit to the secondary market purchaser of the Notes may be incorporated into any offered price and (ii) the cost of funding used to value the Notes in the secondary market is expected to be higher than our actual cost of funding incurred in connection with the issuance of the Notes. In addition, the original issue price of the Notes included, and secondary market prices are likely to exclude, the projected profit that our swap counterparty or its affiliates may realize in connection with this swap. Further, as a result of dealer discounts, mark-ups or other transaction costs, any of which may be significant, the original issue price may differ from values determined by pricing models used by our swap counterparty or other potential purchasers of the Notes in secondary market transactions.

Payment of each Interest Amount and the Redemption Amount will be based on the Applicable Rate, which is a measure of the rate of exchange between the Indonesian Rupiah and the USD. Currency exchange rates are volatile and will affect the holder's return. In addition, the government of Indonesia can from time to time intervene in the foreign exchange market. These interventions or other governmental actions could adversely affect the value of the Notes, as well as the yield (in USD terms) on the Notes

and the amount payable at maturity or upon acceleration. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in Indonesia or elsewhere could lead to significant and sudden changes in the exchange rate between the Indonesian Rupiah and the USD.

The Indonesian Rupiah is an emerging market currency. Emerging market currencies may be subject to particularly substantial volatility, as well as to government actions including currency controls, devaluations and other matters which could materially and adversely affect the value of the Notes.

The methodologies for determining the Applicable Rate may result in a Redemption Amount (or Early Redemption Amount, as the case may be) of the Notes, or an Interest Amount on the Notes, being significantly less than anticipated or less than what an alternative methodology for determining the IDR-USD exchange rate would yield.
