

Summary of the Request MICI-BID-BR-2017-0118

Given the confidentiality requirement submitted by the Requesters, a summary of the Request is presented below:

The Request raises concerns about the quality of life of the Requesters, due to the proximity of their properties to the highway currently under construction, which is carried out as part of the Project. The Request details that, as a result of not being expropriated, material and moral harms have been suffered due to exposure to the environmental pollution that is generated by the work within the construction site (mainly explosions), and due to the loading and transportation of materials in the area.

In addition, this document presents information regarding the different contacts made with the Executing Agency and the Bank's Administration, as well as the Requesters' desire to maintain their identities in confidentiality.

Finally, the Request seeks to pursue both MICI phases of the ICIM process: the Consultation Phase and the Compliance Review Phase.
