

## **“Workshop on the Macroeconomic Effects of Migration”**

*Organized by the Financial Stability and Development (FSD) Network*

*Tuesday October 15, 2019*

*Venue: SE-1035, Inter-American Development Bank, Washington, DC*

*Presentations can be made in either English or Spanish.*

During this workshop we will discuss the macroeconomic effects of migration. The objective is to better understand the impact of immigration from Venezuela on Chile, Colombia, and Peru by examining the data and indicators used to monitor the evolution of immigration in each country. Participants will also learn about current research and models developed by central banks in order to incorporate the effects of immigration. Discussion will focus on the effects of immigration from a macroeconomic and monetary policy angle.
