Apêndice

Indicadores do mercado de trabalho (CD-ROM)

O Apêndice contém indicadores comparáveis dos mercados de trabalho de 18 países da América Latina, com dados a partir de 1990. Os indicadores baseiam-se na análise de mais de 100 pesquisas domiciliares realizadas por órgãos nacionais de estatística.

Há informação sobre a participação da força de trabalho, taxas de emprego, trabalho por conta própria, trabalho em tempo parcial involuntário, trabalho infantil, trabalho juvenil, taxas de desemprego, duração do desemprego, composição do emprego, tempo de serviço, média de jornada de trabalho e nível de escolaridade da força de trabalho. Em sua maioria, os indicadores são apresentados separadamente por gênero, localização geográfica, nível de escolaridade e idade. O Apêndice contém ainda estimativas dos retornos da educação, coeficientes de Gini e outros indicadores de desigualdade salarial. As séries de dados de alguns países são mais longas do que as de outros, mas para todos os 18 países há pelo menos uma observação realizada no fim da década de 1990 ou mais tarde.

Os dados não devem ser vistos como números oficiais de nenhum dos países, mas sim como um conjunto comparável de indicadores dos mercados de trabalho da região. A atualização dos dados será feita em <http://www.iadb.org/res/ipes>.
