# International Identity Management Conference

	Demographic information is vital to provide effective public services. A systematic management of name, birth date, gender, change of address, collected and recorded accurately can provide the basis for providing good public services tailored to each resident. This is all the more necessary in modern society where the needs for customer-oriented services are universal. This session will review the methodology and practices on how to organize and manage a series of information related to residents
<b>11:45-12:00</b>	<b>COFFEE BREAK</b>
	<b>SESSION 6 Secure Identity System for Efficient Management of Social Transactions</b>
