DATE: September 27, 2021

SUBJECT: **Deadline Extension Notification for Requesters to meet some requirements**

Dear Requesters,

After receiving your communication and within the five business days defined by our Policy ([MI-47-8](#)), we reviewed and found that the documentation provided does not comply with the information required to proceed with its registration.

Therefore, this notification is to inform you that we will provide a **10 business-day extension from this date** (the deadline expires on October 12, 2021) to send us your Request containing the required information.

We think it is necessary to talk to you during the next few days to answer your questions, but in the meantime we are sending the following information to help you prepare your Request:

1. MICI Policy Extract, which lists the information required to present a Request
2. Note that seeks to assist you in the preparation of the claim by topic
3. Request Model letter that you can refer to while preparing your own Request

You may find further information in our website (<https://www.iadb.org/en/mici/mici-independent-consultation-and-investigation-mechanism>) and examples of other cases in the [Public Registry](#).

In the event that you could not gather the required information before October 12, 2021 the administrative process will be closed. **However, this does not prevent you from re-submitting your Request once you gather the missing information.**

I am at your disposal to clarify any questions you might have.

Yours sincerely,
